

## How My School Has Helped Me: A Helping Hand

By: Kennedy Sullivan

Lenoir County Public Schools have helped many people in many ways. Lenoir County Public Schools have done projects to help our communities, contributed money, put together many fundraisers, and have worked hard to make our schools the best environment for education.

Most of all, Lenoir County Public Schools want to make the children happy. Lenoir County Public Schools are working hard to fill the children with education. The teachers are coming up with fun, but challenging ways to educate their students.

Lenoir County Public Schools have also helped my family and me in many ways. The teachers have pushed their students to do their best throughout their process of growing up and moving from elementary school to middle school, and then to high school.

The school system has had a big impact in many people's lives. All the teachers dedicate their time to help their students learn. These teachers do not just do their job for money, they want to have the pride of saying that they helped a student to be successful in life. Everyone from teachers to janitors care about their students, and their hard work means a lot to everyone.

These schools have helped me realize that life is more than just living to walk, talk, eat, and sleep. Now I realize that you have to stand up and live life to its fullest. Thanks to my wonderful teachers, principles, and everyone who works for Lenoir County Public Schools, they have shaped me into the person I am today.

I ask myself this question, if the founders of Lenoir County Public Schools would not have started these school systems what kind of person would I be today? Many people are grateful for these public schools because they have helped students learn so many things. The students can go to college and get a good job, and they help the students get ready for the real world, because most of them have not traveled out of their state. To be prepared is something major everyone should know. The teachers help their students as much as they can, so the students can be ready to get a good job, have a family, and to be able to pay taxes, and deal with adult situations.

In conclusion, Lenoir County Public Schools have helped change many peoples lives. They prepared us so we can make a difference in the world. There are so many people without proper schools and education. I am lucky that I have the best school system and best teachers and principles. I am prepared for whatever lies ahead. Nobody knows what the future holds, but the students that attend any of the Lenoir County Schools are ready for whatever lies ahead, because the Lenoir County School systems workers have dedicated a lot of time to all their students. Thanks to everyone who has helped me to be the person I am today, and thanks to everyone who has read this, and I hope you will attend Lenoir County Public Schools!
